

# IYANU HENRY FAMORITIYE

SOFTWARE ENGINEER

## PROFILE

I am a passionate and driven software engineer with a deep love for technology and a strong desire to create innovative solutions. My journey in the world of software development has been a thrilling adventure marked by constant learning and growth.

My technical expertise encompasses a wide range of programming languages, including HTML, CSS and JavaScript but not limited to other object oriented languages. I am well-versed in the entire software development lifecycle, from conceptualization to implementation, testing, and maintenance. I have a strong command of software design principles and a passion for writing clean, efficient code.

## EDUCATION

### Moshhod Abiola Polytechnic Higher National Diploma

October 2014 – October 2020

GPA: 3.04

### Suncity College Secondary Education

2008 - 2014

## WORK EXPERIENCE

### Tony Elumelu Foundation Front-end Engineer Internship 2017-2018

- Assisted in the development and maintenance of front-end web application, resulting in positive impact on the company's overall performance
- Granted additional code review permission after demonstrating strong attention to details that led to a 25% decrease in code errors.
- Provide support to senior front-end developers after becoming proficient in ReactJS, resulting in a stronger, more efficient tech Team.
- Developed and executed front-end development strategies, resulting in a 15% increase in website performance.

### H DINTERIEUR 2021- 2022

### Frontend Developer

- Developed and optimized responsive, accessible front-end interfaces using HTML, CSS, and JavaScript
- Designed and implemented user-friendly web components to improve the user experience for web applications
- Collaborated with cross-functional teams to integrate front-end features with backend systems and databases.
- Delivered front-end solutions that met project goals and supported overall application performance and usability.

## SKILLS

- Web Development
- Technical Support
- Expert in HTML/CSS/JAVASCRIPT
- Technical Writing
- Object Oriented Design
- Proficient with JavaScript and Typescript
- Website Maintenance
- Technical Analysis
- Software Delivery Coordination
- Code Debugging
- Knowledge in UI/UX Design
- Understanding of SEO and security base practice
- Project Management
- Design validation
- Web Trend
- Technical Presentation
- Scripting
- Troubleshooting
- Web Updating
- Front-end Developer React JS
- Web Update
- User Experience
- Knowledge on Git and SVN
- Ability to create unit test for web application
- Familiarity with Agile and Scrum processes.

## KEY ACHIEVEMENT

- **Performance Optimization**

Develop and execute front-end development strategies, resulting in a 15% increase in website performance by implementing optimization technique such as

- **OMINI FOOD AI**

I Develop an AI base food ordering platform that focuses on helping people eat well. This might lead to a poor diet and lasting health consequences. We want to solve this problem by using an AI-centric approach. Users can use our app to select their diet and foods they like and dislike, and our AI algorithm will create a custom and individual weekly meal plan. But we don't stop there. We partner with restaurants and other cooking partners to actually cook and deliver all meals from the generated meal plans, in selected cities.
